KPB Land Bridge Transportation is an intermodal company based out of La Porte, Texas. What started out as a three person - two truck team in 1990, has grown into 50 company drivers that service Houston and the surrounding area. The team can handle over 600 moves per day with their environmentally friendly tractors. Through the Houston-Galveston Area Council through their Clean Cities | Clean Vehicles program, Land Bridge was able to add 45 new green, light weight tractors to their fleet.

Not only are they environmentally conscious, they are also conscientious of their drivers' safety and wellbeing. The two person, dedicated safety department ensures all equipment and driver certifications are maintained and up-to-date.

KPB is headquartered between The Port of Houston's Barbours Cut and Bayport Terminals in La Porte, Texas.
